

IMPORTANT NOTICE : SCHEDULED SEWER OUTTAGE

To the Residents of the Municipal District of Pincher Creek,

Please be advised that **Insituform** will be performing essential maintenance and inspection work on the sewer main lines in your immediate area, on behalf of the Municipal District of Pincher Creek. This work is necessary to ensure the continued reliability and efficiency of the local wastewater infrastructure. Attached is a notice from Insituform explaining the process in more detail.

Project Details

Work Commencement Date: 2026/06/04

Estimated Duration: 9am - 5pm

Important Instructions for Homeowners

- **Please refrain from using the wastewater system between 9-5.** Use of the wastewater system could result in a backup into your property, as sewer lines will be blocked to perform essential maintenance. This maintenance procedure allows the life of the pipe to be extended without performing excavation, and mitigates emergency replacements that result in unplanned downtime. The MD of Pincher Creek and Insituform will not be liable if backups occur.
- **Do Not Block Manholes:** Please ensure that all manhole covers located on or near your property are kept clear. Do not park vehicles, place trailers, or stack landscaping materials (such as gravel or mulch) over manhole lids.
- **Access Requirements:** Maintenance crews require unobstructed access to manholes to monitor system flow and perform necessary repairs.

If access is blocked, the MD will be forced to move vehicles or material at resident cost and may be subject to potential fines per the terms of Utility Bylaw 1344-2
